

Dr. Sylvia Ospina

Sylvia Ospina specializes in the legal / regulatory aspects of satellite communications and related space activities (frequency coordination and launches). Dr. Ospina has worked in the private sector as Director, Regulatory Affairs (Latin America) for ICO Global Communications, and Senior International Policy Advisor, COMSAT World Systems. She has worked as a consultant for private consulting firms and for various international organizations, among them the World Bank, the European Commission in Bruxelles, Belgium, as Expert Satellite Telecommunications Consultant. She was in-country consultant for the International Telecommunication Union (ITU) in several countries. She was invited by the UN Office on Outer Space Affairs (OOSA) to participate in seminars on capacity-building and the development of national space law in The Hague and in Rio de Janeiro, Brazil. In addition, she has participated in numerous seminars and conferences on satellite communications.
