

Prefatory Note

This file has been prepared in the Adobe Acrobat (PDF) file format. Some users have observed that the grid lines in the Treaty Status Table are displayed on their computer screens with varying degrees of emphasis. This effect can be reduced (if not eliminated) by adjusting the Display Preferences in the Acrobat viewer. The “Smooth Line Art” option (in the Smoothing section of the Display Preferences) should have a check mark. The Display Preferences selection can be opened (usually) from the Edit drop-down menu in the Acrobat viewer. This menu is positioned at the top left of the screen on PCs using MS Windows.

If, instead of the Acrobat viewer, you are using the Acrobat plug-in feature to view this file in a web browser (such as MS Internet Explorer), the Preferences window can be opened using the Ctrl-K key combination, or by clicking on the small button immediately above the scroll bar on the right side of the window. This button will appear with a small, right-pointing black triangle on it. Clicking on the button opens a small menu, one of whose selections is “Preferences ...”. Click on “Preferences ...”, then click Display to open the Display Preferences selection.

INTERNATIONAL INSTITUTE OF SPACE LAW
of the
INTERNATIONAL ASTRONAUTICAL FEDERATION

**Standing Committee on the Status of International
Agreements Relating to Activities in Outer Space**

Chairman:

Andrei D. Terekhov
Senior Legal Officer
Office of Legal Affairs
United Nations

ANNUAL REPORT – 2002

Background

At the meeting of the IISL Board of Directors held at Brighton, United Kingdom, in October 1987, the Board decided to create a **standing committee** of the Institute to prepare and submit at each annual Colloquium a report on the status of agreements relating to activities in outer space.

Institute members who can contribute substantively to the work of the committee are invited to serve on it. Membership is open to any interested IISL member. The committee members help collect, review and verify data concerning **selected space agreements**. Agreements of general global applicability or regional applicability are selected for reporting. Bilateral agreements are not included in the report. In general, the agreements included in the present report, and their status, are believed to be valid as of 1 January 2002.

Coded entries are used in the **table** as follows:

R	=	ratification, accession or succession
S	=	signature only
D	=	declaration of acceptance of rights and obligations

When no entry is made in a column opposite a state's name, that state has not signed that agreement, or is not a party to it, or that state has withdrawn from the agreement. Changes from last year are highlighted by “***”.

At the meeting of the IISL Board of Directors held at Paris, France, in April 1998, the Board decided that the report should also contain basic data concerning **Declarations of Principles Relating to Activities in Outer Space** adopted by the General Assembly of the United Nations.
